FENIX FLIGHT TRAINING

This is to certify that

Conrad Blind
Fenix ID:

having undertaken the required course of training and met the assessment requirements is awarded this

Advanced Remote Pilot Certificate

Awarded

27th August 2026

Important Notes:
This certificate constitutes evidence of an approved pilot qualification for the purposes of New Zealand Civil Aviation Rule 101.205 and qualifies the holder to operate within 4km of an aerodrome.

This qualification is an approved initial issue qualification for UAS pilots flying for an organisation certificated under New Zealand Civil Aviation Rule Part 102.

For operations conducted for a Part 102 certificated organisation this qualification remains current for a period of 12 months from the date of the flight test and may be extended for further periods of 12 months on completion of an Operational Competency Assessment.

For operations conducted under Civil Aviation Rule Part 101 this qualification remains current for a period of 24 months from the date of the flight test and may then be extended for further periods of 24 months on completion of a biennial flight test.

This certificate is awarded under the authority of the Part 141 Aviation Training Organisation certificate TR86491 issued by the New Zealand Civil Aviation Authority to Fenix Flight Training Ltd.
